Dynamic Defense Solutions - F.Z.E

Bullet Proof Glass EN 1063, STANAG 4569

Tested and Certified Glass comprised of Polycarbonate and Mylar and are bonded together using the latest technology, producing one of the finest transparent Armors available while incorporating the following.

1. Meets or exceeds levels EN 1063 & STANAG 4569.
2. Multiple impact protection.
3. Anti-spall shield protecting against shattering glass.
4. Finest optical quality offers minimal distortion.
5. Two Years Warranty.

With capabilities of R&D according to customized needs of customer, our products combine superior performance with leading design and engineering standards for any plat forms from Armored SUV, Armored Cars, Armored Truck, Armored Buses, APC, MRAP to Guard Rooms.

Dynamic Defense Solutions - F.Z.E

Armored Heavy Duty Hinges

Machined Hinges, specially engineered for variety of armored vehicles to carry heavy weight for armored door up to B7 Level. These Heavy Duty Hinges on 4 and 5 axle turning lathe and milling machines are made of high-value steel.

Ballistic Steel

Certified Protection Steel Plates, combines excellent properties in ballistic resistance with high strength and average hardness of 300 to 600 HBW, available in 4.0 to 14mm thickness with very good weldability and optimal cold forming performance.

Dynamic Defense Solutions - F.Z.E

Ballistic Steel Gun Turret

Roof Mounted Gun Turret designed with Laser Cut Ballistic Steel, Armored Glass, a best engineering solution with proven track record for light and medium weight armored vehicles.

Ballistic Gun Port

An effective engineering solution, to keep soldiers safe, cutting edge customized technology, suitable for transparent and opaque armor. Our gun port can be installed in armored vehicles, troop-carriers, guard posts and various military applications.

Dynamic Defense Solutions - F.Z.E

APC / MRAP Wheel Assemblies

Customized Turn Key Design up to 36" diameter and 20,000 lbs load. Equipped with military Grade Heavy Duty Tyres and Runflats, our wheel assemblies are best mobility solutions for 4X4, LAV's & MRAP's.

Heavy Duty Tyres and Wheels

Our wide range of HD Tyres covers Michelin, Continental, Cooper, BF Good Rich Brands for Commercial and Military Applications. The best solution to absorb heavy weight of armoring is our recommended Steel Wheels, having load capacity of 1650+ kg.

Dynamic Defense Solutions - F.Z.E

PAX / Runflat System

Tyre inserts are designed to provide extended mobility when one or more tires are deflated. The Runflat is made from a specially formulated lightweight, high strength compound designed to resist crack propagation from ballistic attack and severe road hazards.

High Performance Brakes

Engineered and tested braking system on one of three Link brake dynamometers, on street and track vehicles, and in the laboratory. Designed, engineered, and built to offer significant braking advantages over OEM parts.

Dynamic Defense Solutions - F.Z.E

Heavy Duty Suspension

Quality, application specific, aftermarket suspension designed to increase load carrying capability and improve both vehicle handling and comfort across all terrains. Appropriate for armored vehicles with the armoring weight load beyond 10 Tons.

Fire Suppression System

Non Toxic Fire Retardant, Light Weight and Compact, Excellent Fire knock down and fire out capabilities, FIA Rated – Highest Quality Construction, 2.25 Liter or 4.0 Liter Capacity Available, Manual or Automatic electric system available.

Dynamic Defense Solutions - F.Z.E

Luxury Conversion

Customized most comfortable and luxurious automotive leather seats, With power recliner which allows you to kick your feet up. Delivering tailor-made, custom-fit interiors according to theme of your car.
